ASE LAB 6 REPORT

Yaswanth Bonda
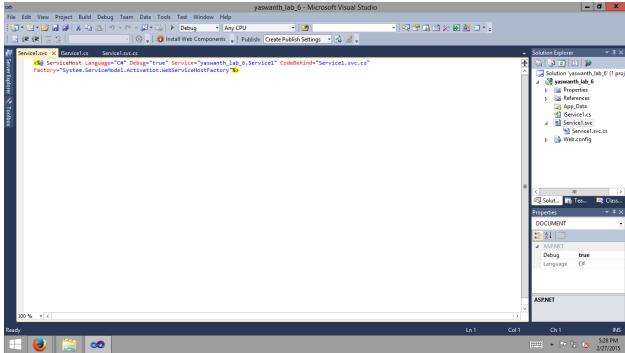

**Lab Id: 5**

Class Id: 6

Output Screenshots:-

First screenshot code (IService1.cs):

```csharp
        string login(String userName);

            // TODO: Add your service operations here
    }

    // Use a data contract as illustrated in the sample below to add composite types to service operations.
    [DataContract]
    public class CompositeType
    {
        bool boolValue = true;
        string stringValue = "Hello ";

        [DataMember]
        public bool BoolValue
        {
            get { return boolValue; }
            set { boolValue = value; }
        }

        [DataMember]
        public string StringValue
        {
            get { return stringValue; }
            set { stringValue = value; }
        }
    }
}
```

Second screenshot code (Service1.svc):

```
<%@ ServiceHost Language="C#" Debug="true" Service="yaswanth_lab_6.Service1" CodeBehind="Service1.svc.cs"
Factory="System.ServiceModel.Activation.WebServiceHostFactory"%>
```

"Welcome tiger"
